DUST COMPLAINT REPORT NO. 89-D2-WSE

Plant Seattle - East Terminal Date 8/29/89

Name and Location of Person Complaining and Frequency of Calls

Name PSAPCA Date 8/29/89

Address David Lenington Time 1:10 p.m.

Location of Complaint East Terminal

Distance and Direction From Plant N/A

Dates of Prior Complaints 3/15/89  
by Same Complainant

Description of Complaint Routine annual inspection. Mr. Lenington emphasized  
the need to sweep in the non-routine areas with the Tennant Sweeper. Also re-  
ported that numerous observations have been made on the dust from our S.S.T.'s.

Action Undertaken 1) We will sweep a wider area. 2) We will install a foam  
seal around the top of the loading spout at the S.S.T.'s.

\*Note: I suspect he is mistaking the rail unload with the SST loadout. That un-  
vented operation generally generates fugitive dust.

WEATHER DATE - PRIOR 24 HOUR PERIOD
